# GETTERS & SETTERS

- This tutorial uses the online Remix IDE to compile and debug the Solidity smart contracts without having to install any software on your computer. An up-to-date online version is accessible at <https://remix.ethereum.org>.
- The Solidity test contract used in the video can be found at: <http://www.mobilefish.com/download/ethereum/TestContract.sol.txt>

# GETTERS & SETTERS

- Simple rules for using the Remix setters and getters:
  - Do not place integers and booleans between double quotes.
  - Addresses must start with 0x and must be between double quotes.
  - Place array values between square brackets.
  - Place all other values between double quotes.
